

Cabasse unveils THE PEARL MYUKI:

The new ultra-portable, ultra-powerful, high-resolution connected, active battery-powered speaker from THE PEARL Collection.

**ULTRA-COMPACT & POWERFUL : ENJOY YOUR MUSIC WIRELESSLY,
WHEREVER YOU ARE, IN MONO, STEREO, OR MULTIRoom !**

Six years after launching the very first connected speaker from THE PEARL collection, now enriched with more than 9 connected audio solutions, Cabasse, an iconic French brand leader in the High-Fidelity acoustics market, unveils THE PEARL MYUKI : a new model of portable, battery-powered, connected, ultra-compact, and elegant high-resolution active speaker. Benefit from the best Cabasse acoustic technologies throughout your home and on the go.

High acoustic performance !

Despite its compact size, this new Cabasse speaker delivers a sound that is both exceptionally balanced and powerful. This is largely thanks to its new speakers, capable of producing up to 109 dB in stereo: a DOM 45 wideband speaker and two high-12 cm bass drivers arranged in a Push-Push layout, operating within a very compact enclosure. These drivers are equipped with honeycomb-structured membranes, ensuring precise, firm, and tight bass. Users will be pleasantly surprised by the impact and depth of the sound produced by these new speakers.

For those who seek quality sound at home or while traveling, wirelessly and with sound tailored to their preferences, THE PEARL MYUKI incorporates top-notch technologies found in high-end Cabasse systems. These include high-resolution streaming, DFE adjustment (which optimizes the audio spectrum in real time based on the listening level, spectral content, and dynamics of the music), automatic CRCS room calibration to optimize sound within your space, and tonal spectrum adjustment.

An ultra-compact, portable, battery-powered High Resolution (HR) connected active speaker with exceptional usage life even at high power.

It boasts a **12-hour battery life**, allowing for cable-free use on a terrace or while on the move. Another innovative feature is its Smart WiFi capability, ensuring uninterrupted music playback when switching between WiFi networks (WiFi 5, 2.4, or Mesh).

A comprehensive HR connected active speaker for Mono or Stereo use in Duo.

With THE PEARL MYUKI, users can opt for mono or acquire two for stereo mode by pairing them, delivering a combined power close to 200 watts RMS. Those already equipped with a Cabasse connected speaker can integrate THE PEARL MYUKI into their current system for multi-room use in mono or stereo. It serves as an ideal complement in settings like kitchens, offices, or bedrooms, especially when paired with another THE PEARL speaker located elsewhere in the house. Additionally, all Cabasse connected systems can be easily paired and controlled via the unique StreamCONTROL application, allowing for NAS use or Airplay 2 compatibility.

Versatile, THE PEARL MYUKI offers comprehensive connectivity, enabling connection to a TV, turntable, CD player, or NAS via its optical cable. It features an Ethernet port and a 3.5mm jack on the back, as well as the ability to play content from a USB/USB-C drive.

A luxurious and refined design in line with the THE PEARL collection - LUXURY AUDIO

With its lifestyle design featuring rounded shapes, THE PEARL MYUKI is an elegant jewel of a speaker that seamlessly integrates into any interior decor. It's available in matte black or matte white finishes with chrome bezels and details in black or silver. Additionally, its woofers feature an embossed Lissajous pattern, adding a touch of sophistication to its aesthetic appeal.

With a diameter of 17 cm and weighing approximately 2 kilograms, THE PEARL MYUKI can be easily moved from room to room thanks to its discreet integrated handle. For outdoor use, it's effortless to transport with the included custom-made bag, which allows for hand or shoulder carrying. Additionally, it can be mounted on the wall using a compatible Cabasse wall bracket.

In terms of ergonomics, THE PEARL MYUKI features 6 illuminated LED tactile keys with discreet haptic feedback, making control effortless (source/play, pause/volume/power).

Available in June

Specifications

Sound level: 103 dB peak mono 109 dB peak stereo

Bandwidth: 30 - 23,000Hz

About Cabasse :

Cabasse (Euronext Growth® Paris – FR001400DIY6 – ALCAB) is a French company founded in 1950 by Georges Cabasse that has always been committed to the perfect reproduction of music and sound without any alteration, coloration, or distortion. Driven by research and the desire to constantly innovate, Cabasse invented and developed the coaxial speaker technology. This technology allows several speakers to be housed in a small space, offering music lovers the essence and thrill of pure sound. After more than 70 years of innovation and acoustic engineering, Cabasse has launched in 2018 THE PEARL COLLECTION, the most complete collection of high-resolution connected active speakers of the world Luxury Home Audio market. Cabasse is 42.27% owned by VEOM Group (Euronext Growth - FR0013530102 - ALCG), a leading European group in the Smart Home universe, pioneer in multi-room and streaming technologies.
